

GENIE® BOOMS PREPARED FOR HARSH WINTER CONDITIONS WITH COLD WEATHER PACKAGE

Essential for many Genie® articulating and telescopic booms when operating in the coldest temperatures, cold weather accessories: improve engine starting in cold conditions, LCD displays, hydraulic drive, or function response.

Package contents vary to accommodate various boom model configurations, and protect different areas of the machine's operation:

Cold Engine Cranking

Synthetic oil, freeze plug and oil pan heaters improve cold engine cranking.

Electronic Response

LCD and platform control panel heaters allow LCD displays and electronic control membranes to respond more quickly in freezing temperatures.

Function Response

The platform manifold recirculation keeps warm fluid continuously flowing between platform functions. An oversized foot switch accommodates winter footwear.

Available as an option or after-market kit for any Genie® boom, contact your Genie® technical support team for more information.
