Key Features

- Comes standard on all Genie® booms with 8 ft. or 6 ft. baskets
- More ways for operators with tools and jobsite materials to easily enter/exit the platform
- Side swing gate gives operators walk-in access to the basket
- Sliding mid-rails on the platform provide flexibility for loading/unloading materials
- Robust basket design engineered to meet market demand
- Compatible with most Genie accessories and options

More Entry Points for Operator Mobility

New tri-entry and dual-entry baskets allows walk-in access to the boom platform

Genie has simplified the way operators enter and exit its boom platforms. The new standard basket offers three entry points on an 8ft basket or two entry points on a 6ft basket to enhance operators' mobility. The side swing gate allows for walk-in access to/from the basket when you are wearing a tool belt, carrying a tool box or needing to load materials in the platform. Sliding mid-rails, engineered into the front and sides of the platform, offer alternative entry and exit points to accommodate your changing worksite conditions.

Designed with the Operator in Mind

With you in mind, we reengineered our boom baskets to enhance your mobility, improving your comfort in, and accessibility to, the platform during long work days. Giving you one basket for everything you need to do, we also increased your flexibility with the tri-entry 8ft basket and dual-entry 6ft basket design so you can get whatever you need, from pressure washers and painting supplies to light fixtures and window glazings, onto the platform to get work done without delay.

Model name	6 ft dual-entry platform	8 ft tri-entry platform

We also engineered it with eight lanyard attachment points to give you the freedom to safely work anywhere on the platform.

INSIGHTS

Genie
A TEREX BRAND

Engineered to Hold Up on Demanding Worksites

Our new dual- and tri-entry platforms are designed to work anywhere you need to go. We targeted our improvements to combine what you like best about our platforms with what you want in a platform. Utilising proven Genie technology and engineering in its construction, we manufacture this new platform with all-steel materials that can't break down or become compromised with repeated use. You can also easily unbolt and replace the platform floor as needed.

We made all these improvements without adding weight to the machine or sacrificing basket capacity. The new baskets can be used on any Genie boom that can be equipped with a 6ft or 8ft basket so you can retrofit your existing fleet to accommodate your customers' demand for these features.
